

plusAI

The digitally sovereign and secure AI platform

Your challenges

Artificial Intelligence is one of the most disruptive technologies on the market today. In a very short period of time, it has taken off around the world. The number of users, applications, and use cases continues to grow. Sooner or later, AI will be a key technology for all businesses.

Organizations now face the challenge of balancing the potential of AI with the limitations and requirements of privacy, data security, and regulatory compliance. The better and more tailored an AI's data set, the more relevant and valuable the answers will be to your business. For AI solutions to deliver real value, they must be fed sometimes highly sensitive data and require access to company-specific information. Data protection and intellectual property concerns often prohibit the use of non-European AI solutions, as sensitive data may end up on servers outside of German or European jurisdictions. However, if companies react too late or too hesitantly to the disruption, they run the risk of losing market share to competitors who are already successfully using AI and reaping the benefits.

Our solution

With the plusAI platform, plusserver offers legal security and compliance, thus ensuring the protection of information and intellectual property. The digitally sovereign and secure AI platform guarantees that you can use your own proprietary data for training purposes and thus create your individual AI. And in the future, you can choose from different AI models based on your use case to create the best AI experience for you. You get better answers and don't have to worry about protecting your intellectual property. plusserver

has a natural approach to open source technology and operates certified data centers in Germany. Our open source DNA makes this sovereign AI possible. Benefit now from the advantages of artificial intelligence, such as increased efficiency and less work for your employees, while retaining sovereignty over your data!

Your benefits at a glance:

- + Cutting Edge: Be at the forefront of technology
- + Jurisdictional security & digital sovereignty
- + AI results with real added value
- + Best consumability
- + Bring your own AI
- + Bring your own use case

plusAI features

Open Source	plusAI is based on our open source cloud pluscloud open.
Multimodality	You can select different AI models depending on your use case. Use the one that works best for you.
Dedicated GPU	We provide you with high-performance, dedicated GPU to unleash the power of your AI use cases.
Private instance	No data can leak out of your private plusAI. Only you use your proprietary knowledge to train your own AI, no one else. Data protection according to German law is guaranteed.
Platform & infrastructure operations by plusserver	Get all the benefits of a modern AI platform without having to build and run it yourself. This allows you to focus on applying the value of AI, while we take care of the rest.

plusserver

Eine souveräne, zukunftsfähige und sichere Cloud

Wir bieten deutschen Unternehmen eine datensouveräne und anbieterunabhängige Basis für ihre digitalen Geschäftsprozesse. Auf unseren sicheren, skalierbaren Cloud-Plattformen realisieren Kunden zukunftsfähige und kosteneffiziente digitale Anwendungen. Wir beraten unsere Kunden zu Cloud-Architekturen sowie zur Integration bestehender IT-Umgebungen. Dabei agieren wir schnell, dynamisch und stets persönlich.

**Sie haben Fragen? Kontaktieren Sie uns.
Wir helfen gerne weiter.
Schnell und unkompliziert.**
